

# Entering a New Phase of Free Cash Flow Growth

July 2021

TSX: DPM

# Forward Looking Statements

Certain statements and other information included in this presentation and our other disclosure documents constitute “forward looking information” or “forward looking statements” within the meaning of applicable securities legislation, which we refer to collectively hereinafter as “Forward Looking Statements”.

Forward Looking Statements are statements that are not historical facts and are generally, but not always, identified by the use of forward looking terminology such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “outlook”, “intends”, “anticipates”, “believes”, or variations of such words and phrases or that state that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved, or the negative of any of these terms or similar expressions. The Forward Looking Statements in this presentation relate to, among other things: certain statements with respect to the estimated capital costs, operating costs, key project operating costs and financial metrics and other project economics, including the three-year outlook provided by the Company; re-rating to an intermediate / mid-tier producer; the commencement of a preliminary feasibility study for Timok; timing of further optimization work at Tsumeb and potential benefits of the planned rotary furnace installation; the processing of Chelopech concentrate; the impact of any impairment charges; price of gold, copper, silver and acid; toll rates; smelter metal recoveries and stockpile interest deductions; the estimation of Mineral Reserves and Mineral Resources and the realization of such mineral estimates; the timing and amount of estimated future production and output, life of mine, costs of production, cash costs and other cost measures, capital expenditures, rates of return at certain of the Company’s deposits and timing of the development of new deposits; results of economic studies; success of exploration activities; success of permitting activities; permitting time lines; currency fluctuations; requirements for additional capital; government regulation of mining and smelting operations; environmental risks; reclamation expenses; potential or anticipated outcome of title disputes or claims; benefits of digital initiatives; the payment of dividends; and timing and possible outcome of pending litigation.

Forward Looking Statements are based on certain key assumptions and the opinions and estimates of management and Qualified Persons (in the case of technical and scientific information), as of the date such statements are made, and they involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any other future results, performance or achievements expressed or implied by the Forward Looking Statements. In addition to factors already discussed in this presentation, such factors include, among others: the uncertainties with respect to actual results of current exploration activities; actual results of current reclamation activities; conclusions of economic evaluations and economic studies; changes in project parameters as plans continue to be refined; possible variations in ore grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; uncertainties and risks inherent to developing and commissioning new mines into production, which may be subject to unforeseen delays; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities; uncertainties inherent with conducting business in foreign jurisdictions where corruption, civil unrest, political instability and uncertainties with the rule of law may impact the Company’s activities; social and non-government organizations opposition to mining projects and smelting operations; fluctuations in metal and acid prices, toll rates and foreign exchange rates; unanticipated title disputes; claims or litigation; limitation on insurance coverage; cyber attacks; risks related to the implementation, cost and realization of benefits from digital initiatives; failure to realize projected financial results from MineRP Holdings Inc.; risks related to operating a technology business reliant on the ownership, protection and ongoing development of key intellectual properties; as well as those risk factors discussed or referred to in any other documents (including without limitation the Company’s most recent Annual Information Form) filed from time to time with the securities regulatory authorities in all provinces and territories of Canada and available on SEDAR at [www.sedar.com](http://www.sedar.com).

The reader has been cautioned that the foregoing list is not exhaustive of all factors and assumptions which may have been used. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in Forward Looking Statements, there may be other factors that cause actions, events or results not to be anticipated, estimated or intended. There can be no assurance that Forward Looking Statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. The Company’s Forward Looking Statements reflect current expectations regarding future events and speak only as of the date hereof. Other than as it may be required by law, the Company undertakes no obligation to update Forward Looking Statements if circumstances or management’s estimates or opinions should change. Accordingly, readers are cautioned not to place undue reliance on Forward Looking Statements.

This presentation is accurate as of the date specified on the title page but may be superseded by subsequent disclosures including press releases and quarterly reports.

# Well-Positioned to Continue Delivering Value to Shareholders

DPM's strong fundamentals continue to represent a compelling value opportunity

## Growing production, declining costs

- **280,000 Au oz.** average annual production<sup>(1)</sup>
- **\$660-\$740/oz.** all-in sustaining cost<sup>(1,2)</sup>

## Significant free cash flow generation

- **Generated \$211M** of free cash flow in 2020<sup>(3)</sup>
- **Attractive** free cash flow yield
- **Returning cash to shareholders** US\$0.03/sh quarterly dividend

## Strong balance sheet

- **\$176M** growing net cash position
- **\$68M** liquid investment portfolio<sup>(4)</sup>
- **No outstanding debt**

## Unique capabilities

- **Adding value** through innovation
- **Securing social license**
- **Industry-leading ESG solutions**

(1) Refer to footnote #1 on slide 32.

(2) Refer to footnote #2 on slide 32.

(3) Refer to footnote #3 on slide 32.

(4) Based on the fair value of DPM's interest in Sabina, INV Metals Inc and Velocity Minerals as at March 31, 2020. Refer to footnote #4 on slide 32.

# Business Strategy

Unlocking resources and generating value to thrive and grow together

- Supported by foundation of core values that guide how DPM conducts its business & informs a set of complementary strategic pillars
- Resources allocated in-line with strategy to ensure DPM delivers value for all stakeholders

# An Industry Leader in ESG

# Adding Value Through Innovation

Leader in mining innovation and operational excellence

Targeting technologies with potential to:

- Increase safety
- Lower mining costs
- Improve operating performance
- Reduce environmental impact

## Innovation in action

- Integrated Mine Waste Facility at Ada Tepe – first of its kind in Europe
- Aerial autonomous survey drones increasing safety and efficiency at Chelopech
- Mechanized emulsion charging at Chelopech
- Vitrification demonstration plant to explore innovative solution to arsenic waste management at Tsumeb

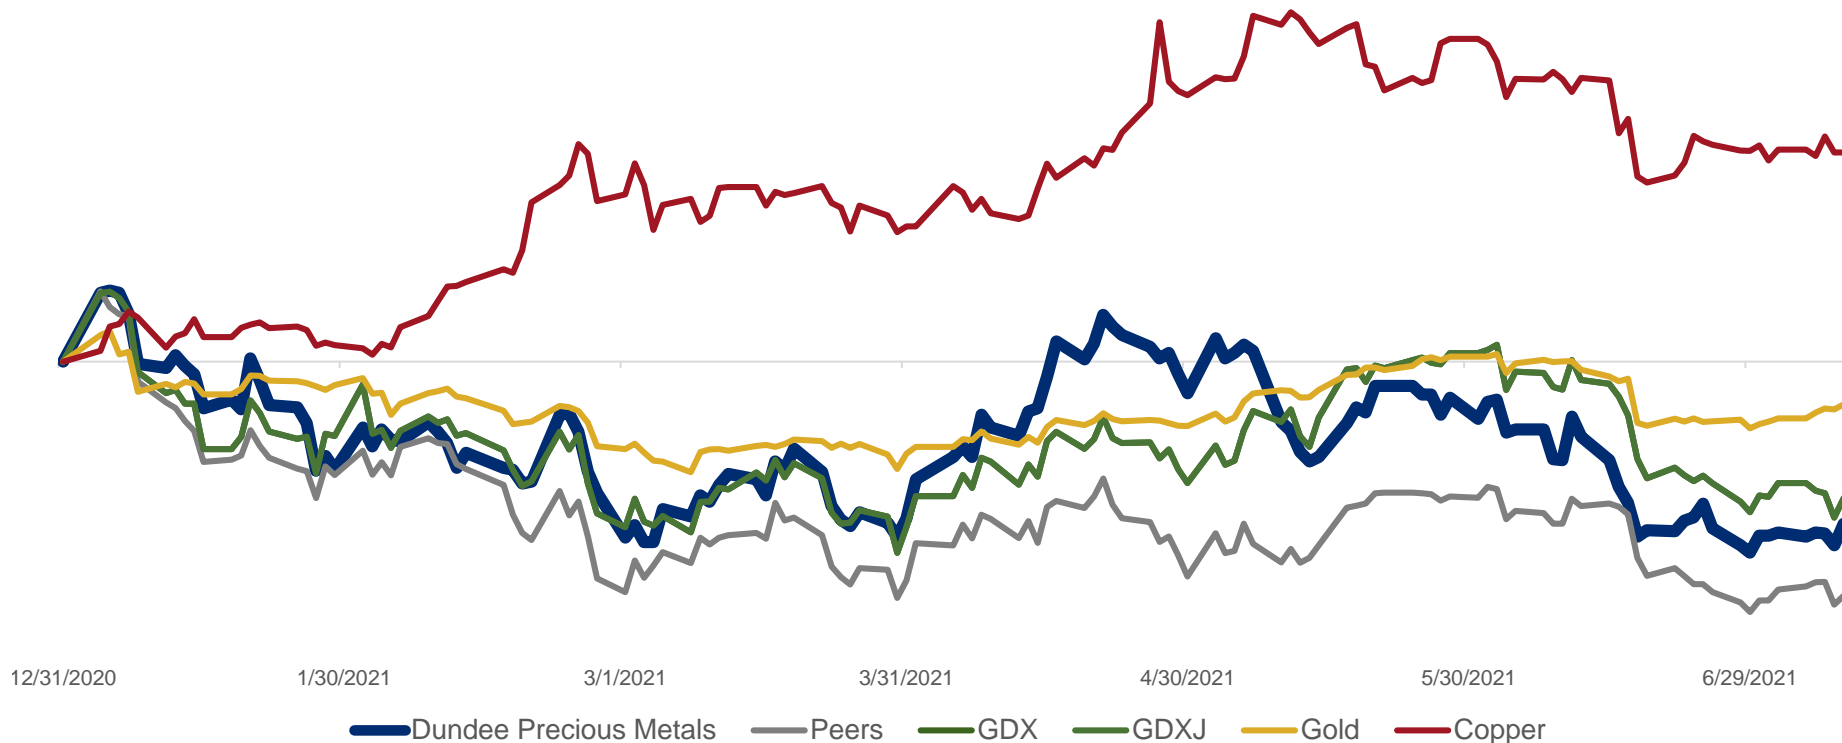

# Focused on Shareholder Returns

Significant further upside potential as we continue to realize growth in free cash flow from Ada Tepe

# Chelopech, Bulgaria: High quality, low cost flagship asset

## A strong, reliable performer

- Strong performance in 2020 with continued mine and mill optimization
- Focused on mine and process plant optimization

Metals contained in concentrate produced ('000s oz)

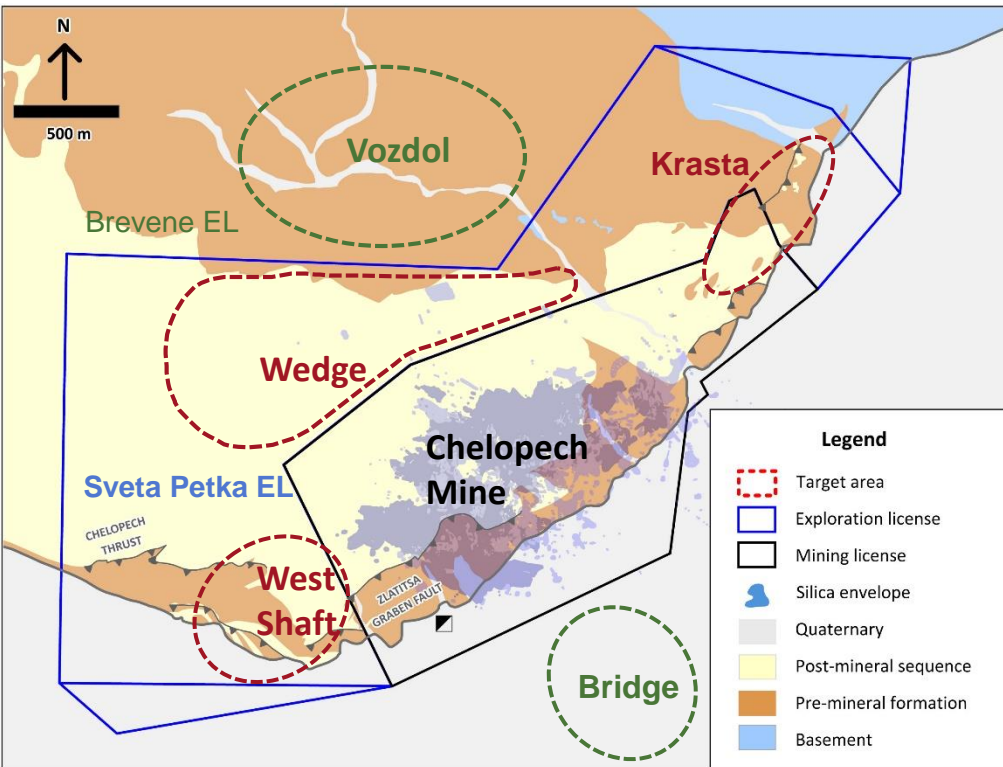

Sustaining capital expenditures (\$M)

# Chelopech Near Mine Exploration to Add Resources

Focused on extending mine life through in-mine & brownfields exploration

## 2020 Brownfields Exploration

- West Shaft:** Aggressive target delineation drilling ongoing with ~7,000 m completed. Initial results include<sup>(i)</sup>:
  - X\_WS\_01: 19.7 m at 2.28 g/t Au & 0.37% Cu (3.04 g/t AuEq)
  - X\_WS\_02: 12 m at 2.60 g/t Au & 0.37% Cu (3.35 g/t AuEq)
- Wedge:** ~4,600 m of deep directional drilling to focus on testing more conceptual targets in proximity to Chelopech. Results include<sup>(i)</sup>:
  - X\_WZ\_07: 5 m at 0.33 g/t Au & 1.42% Cu (3.26 g/t AuEq)
- Krasta:** 6,000 m of infill and extension drilling completed, with geo-metallurgical and resource modelling ongoing. Results include<sup>(ii)</sup>:
  - KR\_33: 21 m at 0.62 g/t Au & 0.33% Cu (1.54 g/t AuEq)
  - KR\_39: 10 m at 1.48 g/t Au & 0.58% Cu (3.25 g/t AuEq)
- Testing conceptual targets at **Vozdol** and **Bridge** with ~2,000 m of scout drilling in Q4

## Plans for 2021: 38,000 m of drilling

- Delineation of **West Shaft**, resource definition at **Wedge** and **Krasta**
- Advancing **Vozdol** and scout drilling of scout drilling of priority targets on the **Breveve EL**
- Advancing additional conceptual targets to target delineation
- A further ~40,000 m of in-mine exploration drilling for resource development

(i) As reported in the Management's Discussion and Analysis for the three and nine months ended September 30, 2020, available on our website at [www.dundeeprecious.com](http://www.dundeeprecious.com)

(ii) As reported in the Management's Discussion and Analysis for the three and six months ended June 30, 2020, available on our website at [www.dundeeprecious.com](http://www.dundeeprecious.com)

# Ada Tepe, Bulgaria

## Driving growth in production and cash flow

- One of the highest grade open pit mines in the world<sup>(i)</sup> with a LOM gold grade of 4.8 g/t <sup>(11)</sup>
- Contributing significant free cash flow generation to DPM's portfolio
- Delivered impressive performance in 2020 and outperformed gold production guidance

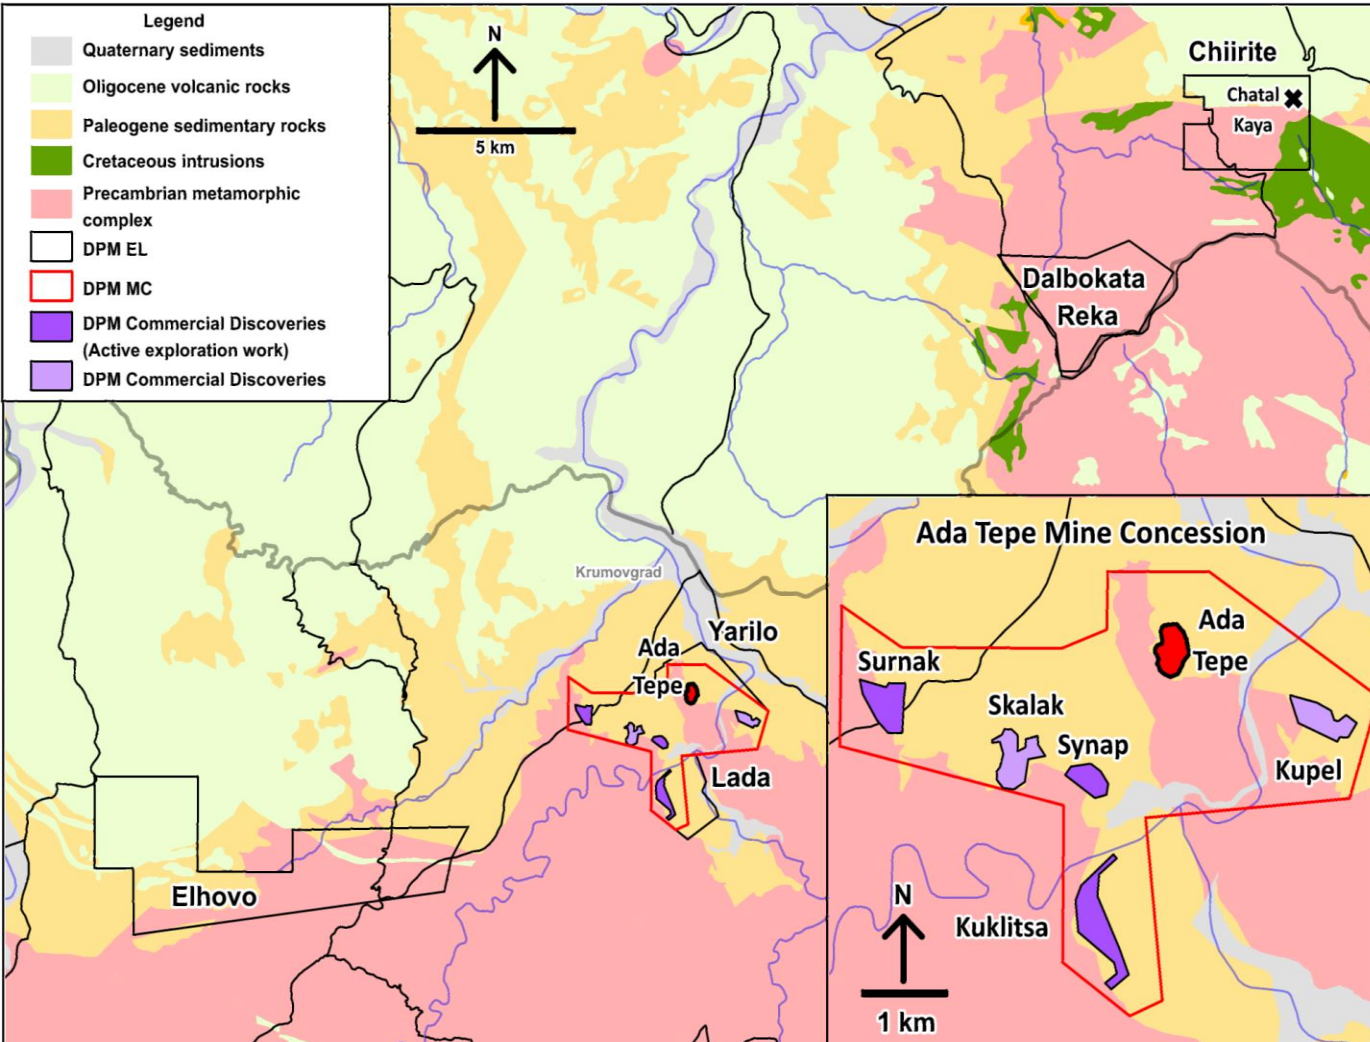

Gold contained in concentrate produced ('000s oz)

Sustaining capital expenditures (\$M)

# Ada Tepe Brownfields Exploration to Add Resources

## 2020 Brownfields Exploration

- Active exploration within mine concession – 8,000 m on **Surnak**, **Synap** and **Kuklitsa**
  - Focused on sulphide mineralization, with goal of extending Ada Tepe’s mine life
- Chatal Kaya**: 6,000 m of target delineation and infill drilling. Significant intercepts include<sup>(i)</sup>:
  - CKDD004: 2.6 m at 36.28 g/t Au & 14.3 g/t Ag including 1 m at 67.86 g/t Au & 14 g/t Ag
  - CKDD006: 6 m at 17.37 g/t Au & 25.3 g/t Ag including 1 m at 60.77 g/t Au & 63 g/t Ag

## Plans for 2021: 23,000 m of drilling

- ~9,000 m for delineation of additional resources and conceptual target extension on the mine concession
- Advancing Chatal Kaya and other prospective targets on regional licenses

# Loma Larga: Well-Aligned with DPM Core Strengths & Unique Capabilities to Unlock Value

Leverages DPM's proven strengths in developing world-class assets and applying industry-leading ESG solutions

## Chelopech

- Similar geology, mining method and processing flow sheet to Loma Larga
- DPM has developed Chelopech into a **world-class, modern operation**
- One of the **lowest carbon footprint gold mines** in the world

## Ada Tepe

- Loma Larga **will benefit from additional engagement with local stakeholders**, similar to the initial stages of development for Ada Tepe
- Ada Tepe is now a highly successful operation that enjoys **strong support from local communities**

## Tsumeb

- Project to produce complex concentrate, with **ability to place material at DPM's Tsumeb smelter** or other outlets
- Operation is **highly regarded** by stakeholders, both at local and national level

# Loma Larga Project, Ecuador: High-Quality Growth Asset

Feasibility study results highlight Loma Larga's potential to add meaningful growth and generate significant value

| Feasibility Study Summary Metrics (April 2020)                |                  |
|---|------------------|
| Initial mine life   | 12 years         |
| Average annual production <sup>(1,2)</sup><br>(first 5 years) | ~200k oz. Au     |
| Average annual production <sup>(2)</sup><br>(LOM)             | 172k oz. Au      |

Note: Based on US\$1,400/oz Au, US\$18.00/oz Ag, US\$3.00/lb. Cu prices per April 2020 Feasibility Study

(1) LOM annual averages based on full production years (year 2 through 11).

(2) Based on average annual gold production for the first five years.

(3) Net of by-products. All-in sustaining cost in a non-GAAP measure. Refer more information about INV's use of this measure, refer to the technical report: "NI 43-101 Feasibility Study Technical Report, Loma Larga Project, Azuay Province, Ecuador" dated June 10, 2020, available at [www.sedar.com](http://www.sedar.com)

# Loma Larga Project, Ecuador

## Next steps to building additional value for all stakeholders

- Prioritize engagement with local communities to develop an acceptable project plan and secure social license
- Review permitting schedule in conjunction with the key stakeholders to refine development timeline
- Minimize up front expenditures throughout permitting process
- Review existing Loma Larga feasibility study for optimization opportunities
- Review EIS with the goal of further enhancing standards
- Secure an investor protection agreement with the Ecuadorian government prior to making any significant capital commitments
- Leverage DPM's technical and stakeholder engagement experience, financial strength and resources to permit, build and operate Loma Larga

# Timok Gold Project, Serbia

## Potential for organic growth

- Project advancing to feasibility study, following positive PFS results
  - PFS focused on the development of the oxide and transitional portions of the project

## Optimization opportunities

- Capital cost optimization** identified an number of opportunities, including:
  - Potential for contractor mining
  - Optimizing design of haul roads
  - Reducing requirement for partially lining waste dumps
  - Exploring owner execution for bulk earthworks
- Potential to add existing resources to the mine plan:**
  - Evaluating potential to incorporate additional oxide, transitional and sulphide portions of the Mineral Resource into the mine plan
  - Timok has an additional 1.3M ounces of Indicated Mineral Resource (32.3Mt at 1.27 g/t)
  - Near mine oxide and sulphide exploration targets

| PFS Highlights <sup>(6, C)</sup>  |                |
|---|----------------|
| Total ore mined (Mt)  | 19.2           |
| Average grade (g/t)   | 1.07           |
| Strip ratio (waste:feed)  | 2.5:1          |
| Average gold recovery (%)   | 82.6%          |
| Total gold ounces recovered (LOM)   | 547,000        |
| Average annual gold production (oz)<br>(First 6 years)                            | 80,000         |
| Average annual gold production (oz)<br>(LOM)                                      | 70,000         |
| AISC (\$/oz Au)   | \$693          |
| Initial capital cost (\$M)  | \$211          |
| After-tax NPV(5%) and IRR<br><i>(based on a \$1,500/oz gold price assumption)</i> | \$135M & 20.6% |
| Life of mine  | 8 years        |

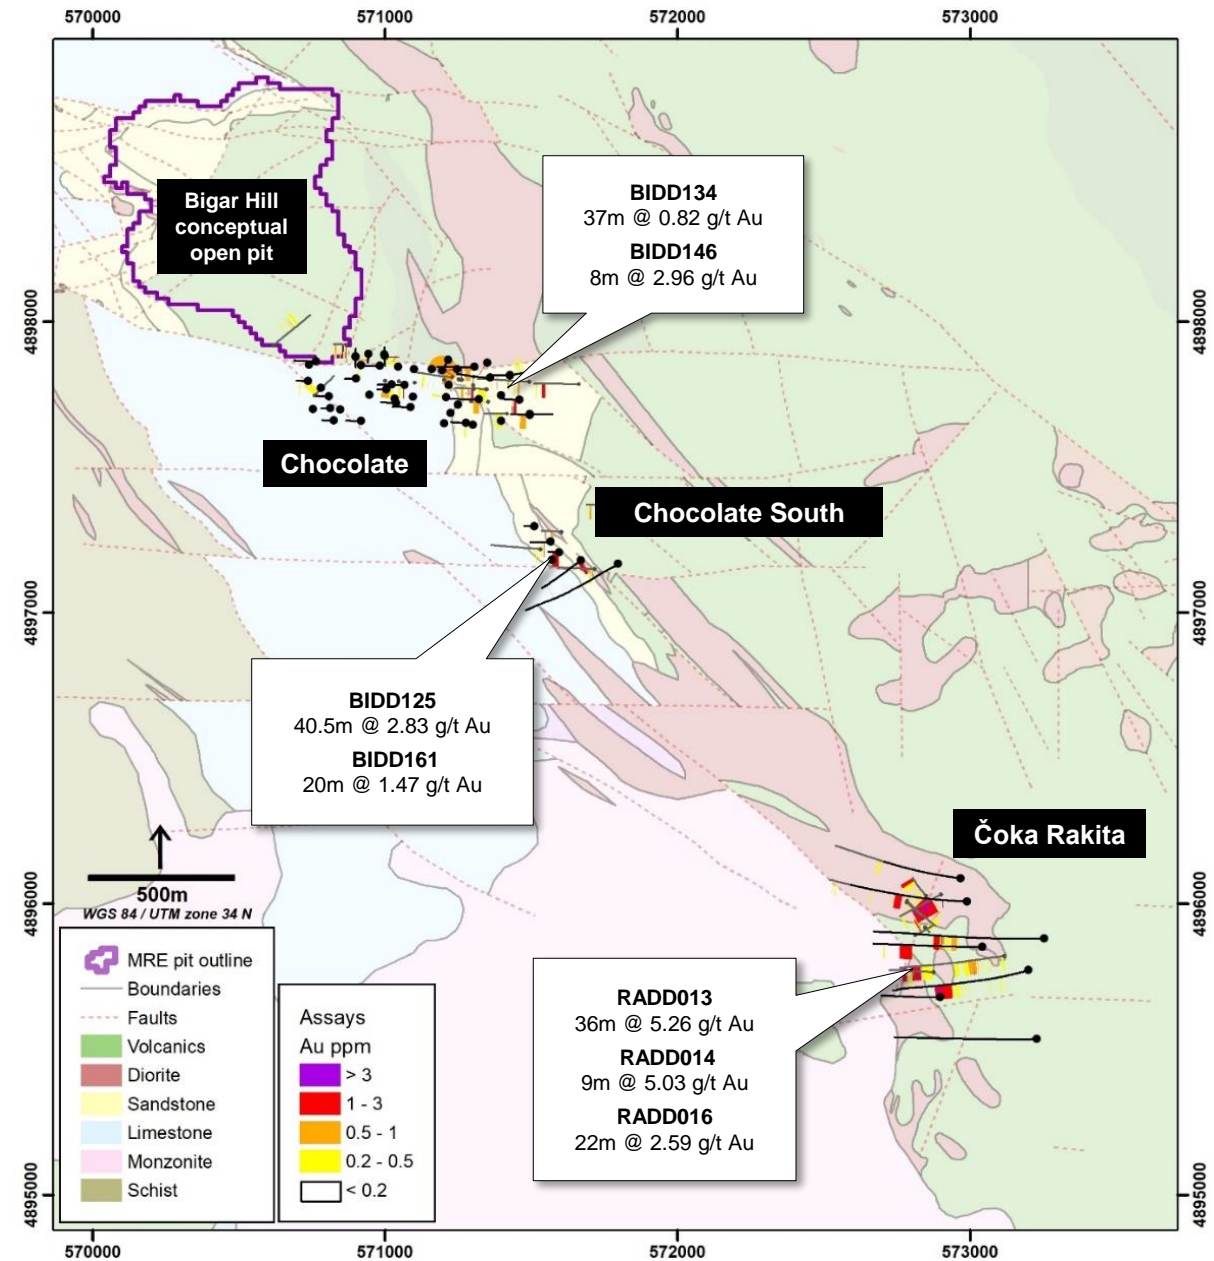

# Timok Gold Project, Serbia

## Adding value through exploration

- Prospective targets generating encouraging results
- Chocolate:** oxide target located approximately 300 m SE of Bigar Hill deposit outlined in late 2020
- Chocolate South:** extension of similar style mineralization outlined in late 2020
- Čoka Rakita:** highly prospective sulphide exploration target located 3 km SE of Bigar Hill

## Plans for 2021: 14,000 m of drilling planned

- Includes exploration and infill drilling in support of the FS
- Drilling will be focused on:
  - Shallow oxide resource delineation at Chocolate and Chocolate South, as well as target delineation
  - Target delineation at Čoka Rakita and other sulphide targets

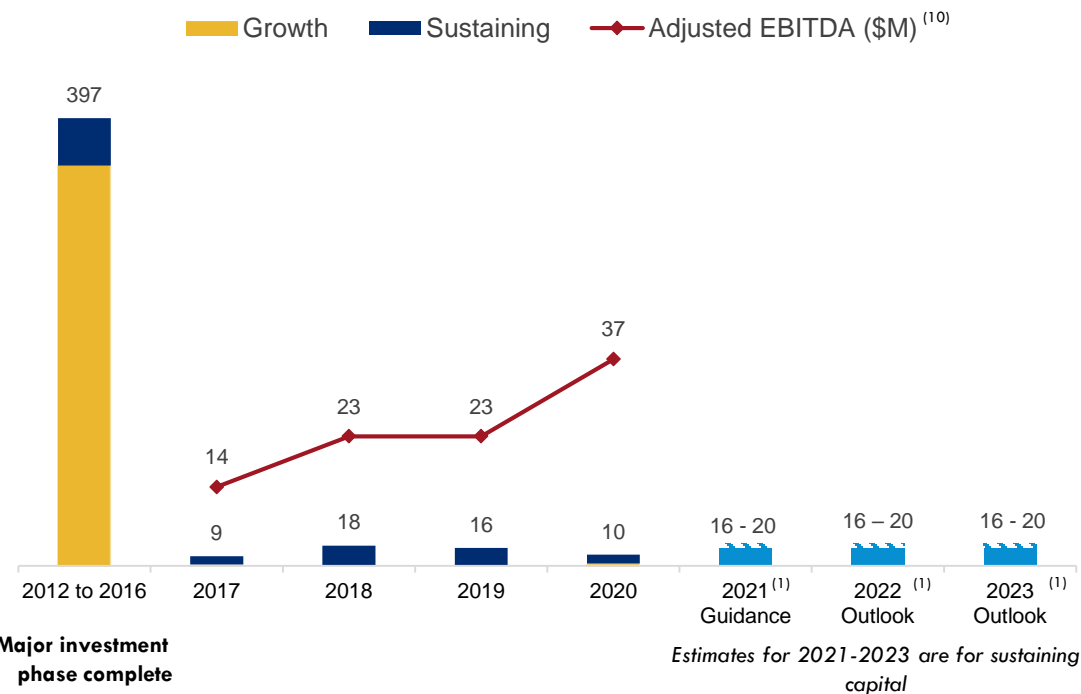

Refer to the news release dated February 23, 2021 for more information on recent exploration results for the Timok Gold project.

# Tsumeb, Namibia: Operating Consistency with Growth Potential

## A secure processing outlet for Chelopech

- Growing cash flow generating custom toll business
- Finalized new 3-year agreement to fill existing smelter capacity
- Focused on operational stability, efficiencies and cost reduction
- Option to expand to 370k tpa in the future
- Exploring potential to add vitrification plan to dispose of arsenic waste (potential timing 2022-2024)

**Total Capital Expenditures (US\$M)**

**Tonnes Processed ('000s t)**

# Additional Upside through Equity Interests

Liquid investment portfolio provides upside exposure to high-quality gold projects

## Sabina Gold and Silver Corp.

Ownership: 8.9%

**Rationale: Originally a DPM project, supportive shareholder in high grade gold project in Canada**

- Sabina proceeding with pre-construction activities
- 240k oz Au/year of production (yrs 1 through 8) <sup>(12)</sup>
- Significant exploration upside with Llama and Umwelt

## Velocity Minerals Ltd.

Ownership: 8.5%

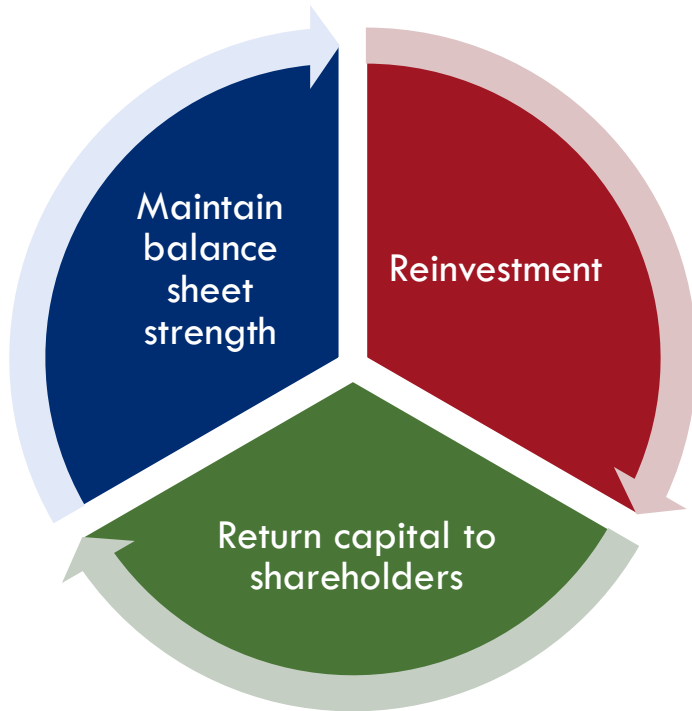

**Rationale: DPM's strong presence and capabilities in southeastern Bulgaria**

- Advancing the Rozino gold project, located ~40km from Ada Tepe mine
- PFS completed in October 2020
  - Probable mineral reserve estimate of 11.8 Mt at 1.22 g/t gold for 465,000 ounces (at a 0.5 g/t gold cut-off grade)<sup>(14)</sup>

# Disciplined Capital Allocation Framework with Quarterly Dividend

Established to manage substantial free cash flow generation

Balances financial strength, reinvestment and return of capital

Options are not mutually exclusive

| Maintain balance sheet strength  | Reinvestment  | Return capital to shareholders   |
|--|---|--|
| <ul style="list-style-type: none"> <li>✓ Eliminate debt</li> <li>▪ Build strong cash position to support accretive growth</li> </ul> | <ul style="list-style-type: none"> <li>▪ Margin improvements</li> <li>▪ Resource development</li> <li>▪ Brownfield exploration</li> <li>▪ Organic growth</li> <li>▪ Disciplined M&amp;A:                             <ul style="list-style-type: none"> <li>• Existing regions or Americas</li> <li>• Principally late stage / producing</li> <li>• Ability to deploy unique skill set</li> <li>• Accretive in the long-term to shareholders</li> </ul> </li> </ul> | <ul style="list-style-type: none"> <li>✓ Increased quarterly dividend to US\$0.03/sh</li> <li>▪ Opportunistic share repurchases</li> </ul> |

# Attractive Valuation

## DPM offers a compelling value opportunity

### Growing production, declining costs

- **280,000 Au oz.** average annual production<sup>(1)</sup>
- **\$660-\$740/oz.** all-in sustaining cost<sup>(1,2)</sup>

### Significant free cash flow generation

- **Generated \$211M** of free cash flow in 2020<sup>(3)</sup>
- **Attractive** free cash flow yield
- **Returning cash to shareholders** US\$0.03/sh quarterly dividend

### Strong balance sheet

- **\$176M** growing net cash position
- **\$68M** liquid investment portfolio<sup>(4)</sup>
- **No outstanding debt**

### Unique capabilities

- **Adding value** through innovation
- **Securing social license**
- **Industry-leading ESG solutions**

### Price to 2021 Cash Flow

### Dividend Yield

### P/NAV

# Footnotes and Disclaimers

1. Forecast/guidance information is subject to a number of risks. 2021 guidance and the Company's three-year outlook as disclosed in Management's Discussion and Analysis ("MD&A") for the period ended March 31, 2021, issued on May 5, 2021, which can be found on the Company's website at [www.dundeeprecious.com](http://www.dundeeprecious.com) and is available at [www.sedar.com](http://www.sedar.com). See "Forward Looking Statements" on slide 2. Gold produced includes gold in pyrite concentrate produced of 50,000 to 56,000 ounces in 2021, and 46,000 to 52,000 for each of 2022 and 2023. Metals contained in concentrate produced are prior to deductions associated with smelter terms.
2. AISC per ounce of gold is a non-GAAP measure which represents cost of sales less depreciation, amortization and other non-cash items plus treatment charges, penalties, transportation and other selling costs, sustaining capital expenditures, rehabilitation related to accretion expenses and an allocated portion of the Company's G&A expenses less by-product revenues in respect of copper and silver including realized gains on copper derivative contracts divided by the payable gold in copper and pyrite concentrates sold.
3. Free cash flow has no standardized meaning under IFRS (see Footnote 2) and is defined as cash provided from operating activities, before changes in non-cash working capital, less cash outlays for sustaining capital, mandatory principal repayments and interest payments related to debt and leases.
4. Investments valued at \$68 million as at March 31, 2021, primarily related to the Company's 8.9% interest in Sabina, 23.5% equity interest in INV Metals Inc. and 8.5% interest in Velocity Minerals..
5. P/NAV based on consensus NAV/Share and the closing price of DPM shares on May 17, 2021.
6. For more information, please refer to the news release titled "Dundee Precious Metals Announces Positive Pre-Feasibility Study and Encouraging New Exploration Results for the Timok Gold Project in Serbia", dated February 23, 2021, which can be found on the Company's website at [www.dundeeprecious.com](http://www.dundeeprecious.com) and available at [www.sedar.com](http://www.sedar.com).
7. Cash cost per tonne of complex concentrate, net of by-product credits, has no standardized meaning under IFRS and represents cost of sales less depreciation and amortization and net of revenue related to the sale of acid, divided by the volumes of complex concentrate smelted
8. Cash cost per tonne of ore processed is a non-GAAP measure. For a reconciliation to IFRS, refer to the "non-GAAP Financial Measures" section of the MD&A for the year ended December 31, 2020, issued on February 11, 2021, which can be found on the Company's website at [www.dundeeprecious.com](http://www.dundeeprecious.com) and available at [www.sedar.com](http://www.sedar.com).
9. Adjusted EBITDA represents earnings before interest, taxes, depreciation and amortization, adjusted for impairment charges, unrealized losses/gains on derivative contracts and investments at fair value, minus interest income.
10. Contained in the 2020 Annual Information Form dated March 30, 2021, can be found on the Company's website at [www.dundeeprecious.com](http://www.dundeeprecious.com) and available at [www.sedar.com](http://www.sedar.com).

# Footnotes and Disclaimers

## Qualified Person Disclosure

- A. The Mineral Resource and Mineral Reserve estimates for Chelopech and other scientific and technical information which supports this press release was prepared by Petya Kuzmanova, MIMMM, CSci, Senior Resource Geologist, of the Company, under the guidance of CSA Global (UK) Ltd. (“CSA”), in accordance with Canadian regulatory requirements set out in NI 43-101, and were reviewed and approved by, as relates to Mineral Resources, Maria O’Connor, BSc, MAusIMM, MAIG, Manager Resources – EMEA of CSA, and as relates to Mineral Reserves, Karl van Olden, BSc (Eng), GDE, MBA, FAusIMM, Mining Manager of CSA. All are Qualified Persons (“QP”) as defined under NI 43-101. Maria O’Connor and Karl van Olden are independent of the Company, and Petya Kuzmanova is not independent of the Company. Ross Overall, Corporate Mineral Resource Manager of the Company, who is a QP as defined under NI 43-101, has reviewed and approved the contents of this presentation. The Mineral Resource and Mineral Reserve estimates contained herein may be subject to legal, political, environmental or other risks that could materially affect the potential development of such Mineral Resources. See the Chelopech Technical Report for more information with respect to the key assumptions, parameters, methods and risks of determination associated with the foregoing Mineral Resource estimates.
- B. The Mineral Resource and Mineral Reserve estimates for Ada Tepe and other scientific and technical information which supports this presentation was prepared by CSA Global, in accordance with Canadian regulatory requirements set out in NI 43-101, as relates to Mineral Resources, Maria O’Connor, BSc, MAusIMM, MAIG, Manager Resources - EMEA of CSA Global and as relates to Mineral Reserves, under the supervision of Karl van Olden, BSc (Eng), GDE, MBA, FAusIMM, Mining Manager of CSA Global. Both are Qualified Persons, as defined under NI 43-101. Maria O’Connor and Karl van Olden are independent of the Company. The Mineral Resource and Mineral Reserve estimates contained herein may be subject to legal, political, environmental or other risks that could materially affect the potential development of such Mineral Resources. See the news release dated October 16, 2020 for more information with respect to the key assumptions, parameters, methods and risks of determination associated with the foregoing Mineral Resource and Mineral Reserve estimates.
- C. The Mineral Resource estimates for Bigar Hill, Korkan and Koran West and Mineral Reserve estimate for Timok and other scientific and technical information included in this presentation were prepared by DRA Americas Inc. (“DRA Americas”), in accordance with Canadian regulatory requirements set out in NI 43-101, and has been reviewed and approved by Shadrac Ibrango, P.Geo, MBA, Lead Geology & Hydrogeology Consultant (DRA Americas); Daniel Gagnon, P.Eng., Senior VP Mining Geology & Met-Chem Operations (DRA Americas); Volodymyr Liskovych, PhD, Principal Process Engineer (DRA Americas); Reywen Bigirimana, M.Sc., PMP, Regional Estimating Manager (DRA Americas); Philip de Weerd, P.Eng, PMP, MBA, Project Manager (DRA Americas). Shadrac Ibrango, Daniel Gagnon, Volodymyr Liskovych, Reywen Bigirimana and Philip de Weerd are Qualified Persons (“QP”) as defined under NI 43-101 and are independent of the Company. The Mineral Resource estimate for Kraku Pester set out in this news release was prepared by CSA Global (UK) Limited in 2018 in accordance with Canadian regulatory requirements set out in NI 43-101 and remains current. Information in this release relating to Kraku Pester has been reviewed and approved by Galen White, FAusIMM, Principal Consultant (CSA Global). Galen White is a QP as defined under NI 43-101 and is independent of the Company. See the news release dated February 23, 2021 and available on our website for more information.

## Cautionary Note to U.S. Investors

This presentation includes Mineral Reserves and Mineral Resources classification terms that comply with reporting standards in Canada and the Mineral Reserves and the Mineral Resources estimates are made in accordance with NI 43-101. NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. These standards differ significantly from the requirements of the Securities Exchange Commission (“SEC”) set out in SEC Industry Guide 7. Consequently, Mineral Reserves and Mineral Resources information included in this presentation is not comparable to similar information that would generally be disclosed by domestic U.S. reporting companies subject to the reporting and disclosure requirements of the SEC. Under SEC standards, mineralization may not be classified as a “reserve” unless the determination has been made that the mineralization could be economically produced or extracted at the time the reserve determination is made. In addition, the SEC’s disclosure standards normally do not permit the inclusion of information concerning “Measured Mineral Resources,” “Indicated Mineral Resources” or “Inferred Mineral Resources” or other descriptions of the amount of mineralization in mineral deposits that do not constitute “reserves” by U.S. standards in documents filed with the SEC. United States investors are cautioned not to assume that all or any part of Measured or Indicated Mineral Resources will ever be converted into Mineral Reserves. United States investors are also cautioned not to assume that all or any part of an Inferred Mineral Resource exists, or is economically or legally mineable.

## Cautionary Note Regarding Non-GAAP Measures

Adjusted EBITDA; adjusted net earnings; adjusted basic earnings per share; free cash flow; all-in sustaining cost per ounce of gold; and cash cost per tonne of complex concentrate smelted at Tsumeb, net of by-product credits, are not defined measures under IFRS. Refer to the “Non-GAAP Financial Measures” section of the MD&A for reconciliations to IFRS measures.
