

**INVESTMENT PROJECT FOR CONSTRUCTION OF SPEED BUMPS AT KM 66+590 AND KM 66+680 AND A PEDESTRIAN CROSSING AT KM 66+650 ON ROAD III-592 (MOMCHILGRAD - KRUMOVGRAD) - PODKOVA - KUKURYAK - TOKACHKA - KRUMOVGRAD, AT URBAN AREAS IN KRUMOVGRAD.**

**PROJECT SUMMARY**

The Investment Project includes construction of two speed bumps at km 66+590 and km 66+680 and one pedestrian crossing at km 66+650 on Road III-592 (Momchilgrad - Krumovgrad) - Podkova - Kukuryak - Tokachka - Krumovgrad, within the boundaries of Krumovgrad, on Hristo Botev Street.

The project will also involve marking of a path to indicate a pedestrian crossing, namely M8.1 –Zebra crossing at km 66+650.

On the left hand side of the road, before and past the pedestrian crossing, there will be steel railing sections, 2x10 m length, and another set of steel railing, 1x10 m and 1x1 m on the right-hand sidewalk.

The construction works will involve thin cut on the asphalt capping to fit the speed bumps and construction of new asphalt capping to correspond to the speed bump design.

The construction works will also include:

- new road marks;
- installation of road signs;

Temporary traffic arrangements will be made to ensure safe traffic within the construction project section of the road and advise the public about and hazards or changes to the usual road.

The heavy traffic in the area requires construction of speed bumps to limit the traffic speed and ensure safe crossing of any pedestrians.

To date, this road section has had no speed pumps or designated pedestrian crossing.
